

## CLAIMS

What is claimed is:

- 5 1. A method of bookmarking a section of a Web page comprising the steps of:
- storing a network address of the page; and
- 10 storing the section of the page such that when the network address is used to access and display the page, the section of the page is displayed.
- 15 2. The method of Claim 1 wherein the section of the page being stored is the section of the page displayed when the network address is stored.
- 20 3. The method of Claim 2 wherein the step of storing the section of the page includes storing current size of a window within which the page is displayed.
- 25 4. The method of Claim 3 wherein the step of storing the section of the page includes storing positions of scroll boxes in scroll bars in the window.
5. The method of Claim 4 wherein the step of storing the section of the page further includes storing font attributes of the displayed page.
- 30 6. The method of Claim 5 wherein the step of storing the section of the page includes storing X-Y coordinates of the window and the scroll boxes.

7. A computer program product on a computer readable medium for bookmarking a section of a Web page comprising:

5 code means for storing a network address of the page;  
and

code means for storing the section of the page such  
that when the network address is used to access and  
10 display the page, the section of the page is displayed.

8. The computer program product of Claim 7 wherein the  
section of the page stored is the section of the page  
displayed when the network address is stored.

15 9. The computer program product of Claim 8 wherein the  
code means for storing the section of the page includes  
code means for storing current size of a window within  
which the page is displayed.

20 10. The computer program product of Claim 9 wherein the  
code means for storing the section of the page includes  
code means for storing positions of scroll boxes in  
scroll bars in the window.

25 11. The computer program product of Claim 10 wherein the  
code means for storing the section of the page further  
includes code means for storing font attributes of the  
displayed page.

30 12. The computer program product of Claim 11 wherein the  
code means for storing the section of the page includes

code means for storing X-Y coordinates of the window and the scroll boxes.

13. An apparatus for bookmarking a section of a Web page  
5 comprising:

means for storing a network address of the page; and

10 means for storing the section of the page such that when the network address is used to access and display the page, the section of the page is displayed.

14. The apparatus of Claim 13 wherein the section of the page being stored is the section of the page displayed  
15 when the network address is stored.

15. The apparatus of Claim 14 wherein the means for storing the section of the page includes means for storing current size of a window within which the page is  
20 displayed.

16. The apparatus of Claim 15 wherein the means for storing the section of the page includes means for storing positions of scroll boxes in scroll bars in the window.  
25

17. The apparatus of Claim 16 wherein the means for storing the section of the page further includes means for storing font attributes of the displayed page.

- 30 18. The apparatus of Claim 17 wherein the means for storing the section of the page includes means for storing X-Y coordinates of the window and the scroll boxes.

19. A computer system for bookmarking a section of a Web page comprising:

at least a memory device for storing data;

5

at least a processor for processing said data to store a network address of the page and to store the section of the page such that when the network address is used to access and display the page, the section of the page is displayed.

10

20. The computer system of Claim 19 wherein the section of the page being stored is the section of the page displayed when the network address is stored.

15

21. The computer system of Claim 20 wherein the section of the page is stored by storing a current size of a window within which the page is displayed.

- 20 22. The computer system of Claim 21 wherein the section of the page is stored by further storing positions of scroll boxes in scroll bars in the window.

23. The computer system of Claim 22 wherein the section of the page is stored by further storing font attributes of the displayed page.

25

24. The computer system of Claim 23 wherein the section of the page is stored by further storing X-Y coordinates of the window and the scroll boxes.
